

Government Facilities, Inc.

## CORPORATE PROFILE

"Get a grip on your Information, VISUALLY..... with Architecturally Engineered Solutions that utilize Innovative Technologies to meet the requirements of today's local, state and Federal Governments. Based in the Washington Metropolitan area, we can manage, organize and streamline your facilities data, infrastructure and operation in compliance with IT Standards for better future data integration and security!"

**AESIT Government Facilities, Inc.** is a Veteran Owned Small Disadvantaged Business that courageously serves the Department of Defense and Federal Government community with a sense of commitment, honor and integrity to the specific goals their organization. AESIT has over 20 years experience in providing executive officials and CIO's with quality configuration management systems, C&A documentation, data sharing, life-cycle management/tracking, software development and integration products and services.

AESIT was founded on a knowledge base derived from real military situations that require real solutions to specific data sharing, mapping, statistical analysis and software integration needs. In the year 1996, AESIT was born in the central Washington DC Metropolitan area with a vision to continue serving needs of the U.S. Government outside of active duty by conceiving new technological solutions that effectively solve mission critical informational goals. We accomplish this through a systematic model of services in analysis, strategic planning, organizational systems development, process improvement and enterprise data management. AESIT architects innovative solutions tailored to assist officials in combating complex problems with simplified solutions. We take pleasure in satisfying clients that seek to develop and implement strategies to improve their operations, manage change, initiate action, and achieve measurable results. AESIT has successfully implemented ad hoc solutions integrating COTS products with legacy platforms and developing proprietary systems for government agencies, private firms, non-profits, organizations and banking institutions such as: *The American Institute of Architects AIA, CompuDyne Corporation, Department of Homeland Security (DHS), Naval Criminal Investigative Service (NCIS), U.S. Department of Treasury and The World Bank.*

AESIT's key strengths include the assembly of specialized teams that possess the enthusiasm, professionalism and innovative strengths necessary to provide our customers with master planning and long term needs analysis that automate legacy system processes, ultimately resulting in a significant enhancement of value in the overall organization. All of which is achieved through the utilization of the most innovative technologies available, and even if we must architect and engineer these solutions ourselves. Through our resources and significant experience in strategy system development and deployment, work process redesign, enterprise development, IT security and compliance, and customized corporate training. AESIT is fit-for-the task and will get it done! AESIT provides a unique combination of state-of-the-art facilities management consulting tools and techniques with knowledge of transitional systems and the ability to integrate to achieve extensive long standing results. AESIT designs systems with a proactive vision to have a sustainable impact, not just for today but for the future.
